Advances in Textiles Technology

A monthly publication covering the latest technologies, processes and materials, worldwide

- Provides a comprehensive overview of new technological advances in textiles.
- Describes new materials available for commercial use and how to exploit them.
- Reports and analyses **new patents** in textile technologies, materials and processes.
- Covers **new applications, new materials and products** from around the world.
- Contains full **contact details** so you can obtain more information immediately.
- Includes information on **state-of-the-art technology** for textile applications.
- Presents **updates** from institutions and companies at the forefront of the latest research.
